Security with System

ASSMANN Presents

New Plug&View Outdoor Cameras

What is the Plug&View System?

Focus on everything that is important!

The Digitus Plug&View System, distinguished with the Innovation Award IT, is an easy-to-install video surveillance solution for your home.

The state-of-the-art concept of the IP-cameras guarantees fast and uncomplicated security solutions for private users as well as for commercial use. Contrary to common network cameras the high-performance Plug&View devices can be installed quite easily, are ready for use immediately and are accessible from everywhere via the Internet. Whether during the day or at night, indoor or outdoor – the possible applications of the cameras have no limits.

When at work you may want to keep an eye on your four legged friends at home or monitor your home remotely to prevent break-ins or theft. The cameras are of course also suited for commercial use – for instance as protective devices against unauthorized access, vandalism or theft. E.g. the devices monitor the company site or the car fleet, hotel facilities, or they secure data centres.

The Plug&View system enables access to the cameras via all common Internet browsers. Especially convenient is the access via your own app which guarantees tailored control of the user account via smartphones and tablets.

The network cameras are equipped with a motion detection function. When the device registers a motion it records it automatically and sends the user a message per mail – if so desired – or stores the data automatically in myDigitus-Cloud. So that the devices record motions also when it is dark they are also equipped with Smart-Light-Control. The recorded information can be called up at any time via the personal user account. A WLAN connection provides uninterrupted transfer of data.

Fields of application

DIGITUS® Plug&View Cameras for the private application area

Baby –
Always keep an eye on your little ones. The ideal alternative if the baby-phone comes to its limits.

Animals –
You want to know what your dog or cat is doing alone at home? Supervise your animals on the go.

The elderly –
Supervise solely living elderly people from the distance and use the chance to react to potential emergencies.

Homestead –
Observe the incidents at home from your working place. Protect your homestead from burglary and thievery.

DIGITUS® Plug&View Cameras for the commercial application area

Hotels –
The DIGITUS® Plug&View cameras are the ideal solution not just for your own accommodations, but also for protection of guests.

Companies –
Protect your company from unauthorized entrance or vandalism as well as your employees from mobbing and thus guarantee self-security.

Data Center –
Here, the focus lies on safety – Protect your data center from unauthorized visitors and thus defend the most sensible aspect of your company: namely company and network data.

Car Pool –
The DIGITUS® Plug&View outdoor cameras are perfectly suitable for the surveillance of your car pool as to defend it from vandalism.

The New Cameras

INDOOR

DIGITUS® OptiDome

Dome-shaped outdoor camera

The DIGITUS® Plug&View OptiDome belongs to the new DIGITUS® Plug&View generation. The dome-shaped design of the camera is as elegant as practical, making it ideal for indoor use. Mounted under the ceiling the indoor camera convinces with a 2 megapixel video resolution.
The simplistic design allows it to blend in perfectly with your home or office decoration. With DIGITUS® Plug&View technology the installation of your OptiDome is done in 3 easy steps. Everything just works with DIGITUS® Plug&View.

OptiDome at a glance:

- 2 megapixel video resolution (UXGA 1600 x 1200, HD720 1280 x 720)
- Low-latency video streaming with H.264 compression format
- Powerful mobile surveillance supporting iOS and Android devices
- Wireless LAN according to the newest 11n standard for fluent image transmission
- Integrated 2GB storage for recording videos and snapshots

The MiniNVR

The First Network Video Recorder for the DIGITUS® Plug&View System!

Video recording of up to 4 Plug&View cameras anytime with access from anywhere. With the DIGITUS® Plug&View MiniNVR recording is possible by simply scanning the QR code with your smart phone in just 3 steps. The network recorder automatically searches and connects your registered cameras. For installation and recording is no more manual configuration needed.

Due to the integrated HDMI interface, the connected cameras can be shown on your local display. So you always have direct access to the live images from the cameras and hence the security at any time to view the videos. With the DIGITUS® Plug&View app you can remotely access your MiniNVR and see the live image of the cameras, or look up the records.

DIGITUS® MiniNVR 329886 / DN-16150

- Full HD audio/video transmission (1080p)
- Storage capacity max. 2TB over USB port, or max. 32GB over microSD card
- 4 channel Live-view at local display with 1080p Full HD HDMI output
- Record of up to 4 cameras with 20fps @ 640x480
- LAN(RJ45) input jack
- LAN Speed: 10/100Base-TX Ethernet
- IR remote control
- Video compression format MJPEG, audio compression format G.711
- Live-view by remote access: 1CH Live-view via browser on plug-view.com or DIGITUS® Plug&View app
- 1 CH remote playback via browser on plug-view.com or via DIGITUS® Plug&View app
- Recording: event, scheduled recording
- Registration: QR code scan to register MiniNVR, the MiniNVR auto searches IP cameras and then auto-bind them under your Plug&View account
- Operating temperature: 0°C - 40°C
- Power source (±10%): DC5V / 2A
- Power consumption: 3.5W (excludes USB storage power consumption)
- Dimensions (mm): 90.3 (L) x 33.15 (W) x 12.1 (H)
- Supports DIGITUS® Plug&View app for smart phone and tablet access
- Operating system independent, supports e.g. Windows, Mac OS, Linux and Sun
